

Mathiot's Paradise Nigerian Dwarf Goats

We started our goat adventure in 2009 looking for something to fill the pasture as well as occupy our extra time as our children grow into adulthood. Little did we know at the time how many wonderful benefits we would find. To the great tasting milk that we enjoy daily. The joy and pleasure we found from owning, loving and showing our goats is awesome.

The people that we have met on this journey have been wonderful. Not to mention the feeling of my skin after using our products is truly unbelievable.

**At Paradise our goat are
well fed and very loved.**

Mathiot's Paradise Goat Milk Soap and Lotion Products

The benefits of fresh goats milk.....

Ever since Cleopatra filled the bathtub with it, fresh goats milk has been admired for it's moisturizing properties.

Shorter protein strands allow for easy absorption. The natural vitamins and minerals in fresh goats milk our absorbed in the skin right along with the protein, helping to nourish healthy skin and clearing up those rough dry spots.

Milk also contains lactic acid which helps to exfoliate, cleanse and soften the skin. Goats milk has a similar PH to our own skin making it very gentle on even the most sensitive skin. Our goats are hand milked twice a day in order to provide the milk that is the basis for each bar of soap and bottle of lotion. We put as much care into taking care of every goat as we do in making our products.

Our Goats walk all over us!
